CHRISTOPHER NEALE

Marketing Data & Applied AI

Raleigh, NC | 984-382-3980 | cjneale.analyst@gmail.com | linkedin.com/in/christophernealeanalyst | cjneale.xyz

SUMMARY

Marketing data and applied-AI practitioner with 6 years across marketing and data roles, most recently Senior Manager, Marketing Insights & CRM Analytics at flyExclusive. Builds the systems that connect marketing to revenue: conversion tracking, offline conversion uploads, attribution, CRM data architecture, and experimentation. Writes the pipelines in SQL and Python and builds LLM-powered tools end to end. M.S. in Data Science.

SKILLS

Measurement & Growth: Google Tag Manager, Meta Pixel and Conversions API, Google Ads conversion tracking, offline conversion uploads, multi-touch attribution, A/B testing, GA4, funnel analysis

Data & Systems: SQL, Python (pandas, scikit-learn), Databricks, Postgres, REST APIs, data pipelines, HubSpot, Iterable, CRM/CDP architecture, Master Data Management

Applied AI & BI: LLM pipelines, RAG, LangGraph agents, PyTorch, XGBoost, model evaluation, Tableau, Power BI, Claude Code

PROFESSIONAL EXPERIENCE

flyExclusive, Raleigh, NC *Senior Manager, Marketing Insights & CRM Analytics* *Nov 2025 – Present*

- Migrated the company website off a legacy CMS to a custom-built site with data pipelines for active quoting, and implemented its conversion tracking: Google Tag Manager, Meta Pixel and Conversions API, and Google Ads conversion tracking.
- Set up offline conversion uploads sending downstream CRM outcomes back to ad platforms, so campaigns optimize on qualified leads and sales rather than form fills.
- Led a CRM systems transformation on HubSpot: governance, scalable data architecture, deduplication workflows, and Master Data Management, creating a single source of truth for the sales organization.
- Redesigned performance dashboards and attribution frameworks connecting marketing activity to acquisition, retention, and high-value segments.
- Engineered an autonomous enrichment pipeline connecting LLM APIs to the CRM database, generating personalized outreach content and powering a lead-scoring model that prioritizes high-value accounts.
- Shipped sales tools: a Python competitive-pricing app that directly shaped 2026 pricing strategy, and AI proposal and agreement tools that produce company-approved documents at scale.

TRANZACT, Raleigh, NC *Sr. Data Analyst, CRM* *May 2022 – Nov 2025*

- Ran a structured A/B testing program for segmentation and campaign optimization: 50% test win rate and a 30% CTR improvement.
- Engineered CRM/ESP integrations (SQL, JSON REST APIs) syncing behavioral data into Iterable for 10+ lifecycle campaigns.
- Ran multi-touch attribution modeling and partnered with commercial and finance leadership on sales performance and forecasting, turning results into investment recommendations.

American Kennel Club, Raleigh, NC *Email Marketing Associate* *Apr 2021 – May 2022*

- Developed Tableau-driven audience insights to optimize email program performance.
- Automated customer journeys with dynamic, segment-driven email content.

OnPoint, Raleigh, NC *Marketing Manager* *Oct 2020 – Apr 2021*

- Led lifecycle strategy and audience targeting across email and paid social, aligning C-suite stakeholders on data-driven marketing execution.

FEATURED PROJECTS

From Attribution to Ad Spend, Budget Allocation Framework (portfolio site)

- Designed a five-step framework linking attribution to budget (illustrative data): deduplicated conversions, four attribution models compared, lift-test calibration, and reallocation on marginal cost per incremental customer. https://cjneale.xyz/#/project/attribution

UTM Journey Tracker, Live First-Party Tracking (portfolio site)

- Built a UTM taxonomy enforced in code and a first-party tracker that dedupes events into Postgres (Neon), flags bad tags at read time, and feeds a real-time journey dashboard; honors Global Privacy Control, with no cookies or IP storage. https://cjneale.xyz/#/project/utm-journeys

PodFlow, M.S. Data Science Capstone, Eastern University, 2025

- Built a full audio-to-insight pipeline solo, from RSS ingestion into Postgres: transcription (faster-Whisper), automatic content segmentation via a trained CNN-BiLSTM model (benchmarked against XGBoost, focal loss for class imbalance), and LLM-based metadata enrichment, served through a REST API to a working web app.
- Created an offline evaluation framework scoring precision/recall/F1 against 16 hand-labeled episodes, and deployed a local quantized LLM (Qwen2.5 via llama.cpp) with a rules-based fallback for resilience.
  https://cjneale.xyz/player.html

ChefAI, Agentic Meal-Planning Assistant (LangGraph)

- Built a conversational meal-planning agent on a LangGraph state machine, using a conditional router that dispatches to whichever slot (allergies, diet, dislikes, craving, prep time, budget) still needs filling, with LLM-based extraction pulling structured fields from free text.
- Made a deliberate agent-autonomy-versus-structure tradeoff: accepted added latency and cost from LLM-based slot extraction for a materially better conversational experience than a rigid form.
